

**CERTIFICATION OF ADMINISTRATIVE RULES
FILED WITH THE LEGISLATIVE REFERENCE SERVICE
JERRY L. BASSET, DIRECTOR**

(Pursuant to Code of Alabama 1975, § 41-22-6, as amended).

I certify that the attached is/are a correct copy/copies of rule/s as promulgated and adopted on the 3rd day of August, 2012, and filed with the agency secretary on the 16th day of August, 2012.

AGENCY NAME: State Health Planning and Development Agency
(Statewide Health Coordinating Council)

X Amendment; _____ New; _____ Repeal; (Mark appropriate space)

Rule No. 410-2-4-.11(4)(d)

(If amended rule, give specific paragraph, subparagraphs, etc., being amended)

Rule Title: Substance Abuse

ACTION TAKEN: State whether the rule was adopted with changes from the proposal due to written or oral comments;

The rule was adopted with changes from oral comments as discussed at the August 3, 2012, Public Hearing.

NOTICE OF INTENDED ACTION PUBLISHED IN VOLUME XXX

ISSUE NO. 8, DATED May 31, 2012.

Statutory Rulemaking Authority: Code of Alabama, 1975 §§ 22-21-260(13), (15) and -274; 22-4-8(b)(2).

(Date Filed)
(For LRS Use Only)

LEGISLATIVE REFERENCE SERVICE

Alva M. Lambert
Alva M. Lambert, Executive Director
State Health Planning and Development Agency
(Certifying Officer or his or her Deputy)

(NOTE: In accordance with § 41-22-6(b), as amended, a proposed rule is required to be certified within 90 days after completion of the notice.)

410-2-4-.11 Substance Abuse

(1) Discussion

(a) The National Household Survey on Drug Abuse (NHSDA) estimated 16.6 million Americans age 12 or older in 2001 were classified with dependence on or abuse of either alcohol or illicit drugs, a figure significantly higher than in 2000 – about 14.5 million. Most of these persons (11.0 million) were dependent on or abused alcohol only. Another 2.4 million were dependent on or abused both alcohol and illicit drugs, while 3.2 million were dependent on or abused illicit drugs but not alcohol. Persons age 18 to 25 had the highest rates of alcohol dependence or abuse (14.8 percent). (Source: www.samhsa.gov)

(b) There are more deaths and disabilities each year in the United States from Substance Abuse than from any other cause. One-quarter of all emergency room visits, one-third of all suicides, and more than one half of all homicides and incidents of domestic violence are alcohol-related. (Source: www.ncadd.org)

(c) Alcohol and drug abuse costs the American economy an estimated \$276 billion per year in lost productivity, health care expenditures, crime, motor vehicle crashes and other conditions. (Source: www.ncadd.org)

(2) Background

(a) Substance abuse services for persons with both dependence and abuse problems is provided through an array of private and public providers throughout the state. The array of services ranges from inpatient medical detoxification services to residential treatment services to a variety of outpatient types of services including various affiliated support groups.

(b) In the past few years the technology for treating individuals with dependence and abuse problems has changed rather dramatically from a traditional inpatient/residential mode to outpatient treatment. This has occurred for a variety of reasons including financial considerations. These phenomena can be verified through analysis of current utilization of both inpatient and residential services.

(3) Methodology

(a) The Alabama Department of Mental Health/Mental Retardation (DMH/MR) has developed a substance abuse bed need methodology, which is based upon a formula utilized in other states, commonly referred to as the “Mardin Formula”. This prevalence base formula was selected in lieu of utilization-based formulas due to the lack of comprehensive statistical information on the current utilization of residential treatment centers. Calculation of needed beds is performed as follows:

(b) Step 1: Multiply the population ages 10-17 by 19%, which is the proportion, assumed to have problems with chemical dependency;

(c) Step 2: Multiply the population ages 18 and over by 7%, which is the proportion assumed to have problems with chemical dependency;

(d) Step 3: Multiply the sum of steps 1 and 2 by 12%, which is the proportion who will seek treatment annually;

(e) Step 4: Multiply the product in step 3 by 60% which is the proportion of those seeking treatment who will require detoxification services for 3 days. Calculate total number of patient days;

(f) Step 5: Multiply those receiving detoxification services by 50%, which is the proportion who will need residential treatment for 10 days. Calculate total number of patient days;

(g) Step 6: Add the patient days in steps 4 and 5 to arrive at total patient days;

(h) Step 7: Divide by 365 to determine average daily census (ADC);

(i) Step 8: Divide by 80% occupancy to arrive at total needed beds;

(j) Step 9: Subtract existing public beds to arrive at total private bed need;

(k) Step 10: Subtract existing private beds to determine need or excess.

BED NEED CALCULATIONS 2005

Population		Persons with SA Problems	Persons Seeking Help	Detoxification Days	Residential Days	Total Days
531,145	3,507,562	346,447	41,574	74,832	124,720	199,552

Average Daily Census	80% Occupancy	Public Beds	Private Beds	Beds Needed
547	684	616	432	(364)

Alabama 2002 Hospital H-5 Report

(4) Methadone Treatment

(a) Definition. Methadone is an opioid agonist medication used to treat heroin and other opiate addiction. Methadone reduces the craving for heroin and other opiates by blocking receptor sites that are affected by heroin and other opiates.

(b) Background

1. Prior to June 1991 Alabama operated two methadone clinics in Birmingham and in Mobile, both of which were operated through a DMH/MR contract. These clinics are part of the UAB Mental Health Center and the Mobile Mental Health Center. The average number of clients served in any given month never exceeded 380 of which fewer than 5% were clients from out of state.

2. As of January 2004, Alabama has nineteen certified methadone treatment programs and several others under development.

(c) Recommendations

1. A methadone treatment program should provide adequate medical, counseling, vocational, educational, mental health assessment, and social services to patients enrolled in the opioid treatment program with the goal of the individual becoming free of opioid dependency.

2. The Methadone Advisory Committee suggests the following information be submitted with Certificate of Need applications:

(i) The number of arrests for the previous year regarding the sale and possession of opioids by county for the area to be served.

(ii) Data from the Medical Examiner regarding all deaths related to overdose from opioids by county for the area to be served during the previous year.

(iii) Data from all hospital emergency rooms regarding the number of persons diagnosed and treated for an overdose of opioids by county for the area to be served.

(iv) The number of clients within specific geographic areas who, out of necessity, must travel in excess of 50 miles round-trip for narcotic treatment services.

(v) The name and number of existing narcotic treatment programs within 50 miles of the proposed sight.

(vi) Number of persons to be served by the proposed program and the daily dosing fee.

(d) Need

1. The need for methadone treatment programs should be based on information provided by the applicant for certificate of need which acknowledges the importance of considering the demand for services along with need and addressing and analyzing service problems as well.

2. As of April 20, 2012, there are twenty certified methadone treatment programs in Alabama, with two additional programs under development. On April 18, 2012, the Certificate of Need Review Board passed a resolution requesting that the SHCC consider revisions to the State Health Plan to provide additional guidance for the consideration of applications for new methadone clinics and to impose a moratorium on new applications pending the outcome of such review. Given the increase in the number of methadone treatment facilities over the last few years, no further certificate of need applications for new methadone treatment facilities shall be considered for a period of one year pending the SHCC's review of this issue and the adoption of a new need methodology. In the event the SHCC does not adopt a new need methodology within the one year moratorium period, the existing need criteria shall remain in place.
