**Re: Request for Project Modification
Central Alabama Orthopedic Ambulatory Surgery Center, LLC
Project No. AL2023-035, CON 3056-ASC**

Ms. Marsal:

Pursuant to *Alabama Administrative Code* r. 410-1-10-.3(b), Central Alabama Orthopedic Ambulatory Surgery Center, LLC (“Central Alabama”), submits this Request for a Project Modification related to Certificate of Need (“CON”) Project AL2023-035, CON 3056-ASC. A filing fee in the amount of \$8,460.00, which is 35% of the original CON Application’s \$24,684.00 filing fee, has been submitted electronically. Confirmation of payment is attached hereto, and by this reference, incorporated herein as **EXHIBIT A**. Central Alabama respectfully requests that the CON Review Board authorize a Project Modification, approving the relocation of the project along with confirmation that the project remains a multi-specialty ASC in which *more than one* surgical specialty is offered consistent with the *State Health Plan* in effect at the time the CON was granted.

Background. In November 2024, UAB St. Vincent’s Health Care Authority (UAB St. Vincent’s) acquired Ascension St. Vincent’s Health System (“Ascension”). Central Alabama was a part of that transaction. As outlined in the CON application, Central Alabama was intended to be a hospital/physician-owned, multi-specialty ASC *primarily* focused on orthopedic surgery but also providing *additional surgeries*, such as pain management services. The ASC was intended to be a joint venture between Ascension, certain orthopedic surgeons practicing medicine at Andrews Sports Medicine and Orthopedic Center, P.C. (“ASMOC Physicians”), and a third entity, US Orthopaedic Partners (“USOP”).¹ Prior to construction of the project, the individual ASMOC Physicians and USOP were to purchase a minority ownership interest in the ASC from Ascension, which at the time the CON was issued, owned 100% of Central Alabama.² The CON identifies Homewood, Alabama and specifically, 600 Brookwood Village, as the physical location for the multi-specialty ASC.

However, the joint venture was not finalized before UAB St. Vincent’s acquired Ascension – leaving Central Alabama with the CON authority to construct and operate a multi-specialty ASC and the other intended joint venture parties, ASMOC Physicians and USOP, with the right to develop/lease the Brookwood property. Negotiations to finalize the hospital/physician joint venture reached an impasse and have not progressed, leaving Central Alabama as the sole owner of the ASC project.

Earlier this year, Orlando Health, on behalf of Baptist Health Brookwood Hospital and Baptist Health Princeton Hospital, filed separate CON applications to develop and operate two ASCs at the same physical address identified

¹ USOP is an orthopedic management services organization.

² CON Application, Part One, Section III, *Executive Summary*, p. 4.

on the face of the Central Alabama CON. As a result of this discrepancy, none of the entities can bring their ASC projects to completion without a resolution of the locational issue.³

Project Modification Request

1. **Request to Relocate CON 3056-ASC.** Central Alabama respectfully submits this Request for Project Modification to relocate its ASC project from the 600 Brookwood Village Drive, Homewood, Alabama address in Jefferson County to property located on University Avenue in Birmingham, Alabama between the University of Alabama Hospital main campus and UAB St. Vincent's Birmingham Hospital. The property is owned by UAB Medicine Enterprise. Costs related to the ASC project, originally estimated to be approximately \$125M, will generally remain the same because most of the project's construction and development costs will shift from the third-party developer, USOP, to Central Alabama. A map identifying the new location of the ASC and a revised copy of the CON Application, Part I, Section IV, COST, and Part V, Sections IV and V, OUTPATIENT UTILIZATION and PROJECT SPECIFIC FINANCIAL INFORMATION are attached hereto and, by this reference, incorporated herein as a part of this Project Modification as **EXHIBITS B** and **C**, respectively.

2. **Multi-Specialty ASC.** When the Central Alabama ASC CON was issued, the CON Review Board determined that the proposed project was consistent with the 2020-2023 Alabama State Health Plan ("SHP"). At the time, the SHP provided that ASCs were either a "multi-specialty [ASC] in which more than one surgical specialty is represented" or a specialized ambulatory surgery center in which a single, exclusive surgical specialty is provided".⁴ Throughout the CON Application, Central Alabama makes several references to the fact that more than one surgical specialty would be provided at the multi-specialty ASC and that although the ASC would "almost entirely be focused on providing orthopedic surgeries, additional surgeries, such as pain management services, [would] also be provided".⁵ The SHPDA Staff Report and Press Release echoes these statements.

Additionally, because the hospital/physician joint venture did not materialize, Central Alabama has identified alternative "sources of utilization" for a multi-specialty ASC, which offers more than one surgical specialty. The additional "sources of utilization" include other UAB St. Vincent's physicians and surgeons who would perform multi-specialty surgery services at the ASC and clinical affiliation agreements with the medical and surgical residency and fellowship training programs at the University of Alabama Hospital. Central Alabama will, consistent with the SHP then in effect at the time the CON was granted, offer multi-specialty surgical services, including orthopedics and pain management services and other ASC-appropriate surgery procedures, including but not limited to, gastroenterology, dermatology, otolaryngology, plastic surgery, urology, gynecology, and podiatry. A revised copy of the Schedule of Proposed Charges is attached hereto and, by this reference, incorporated herein as a part of this Project Modification as **EXHIBIT D**.

We respectfully request, therefore, that the CON Review Board (a) approve the relocation of the proposed project and (b) confirm that the ASC remains a *multi-specialty* ASC in which *more than one* surgical specialty is offered (without limitation).

³ Central Alabama has attempted to reach an amicable resolution to this issue and remains open to negotiations involving issues directly related to, and arising from, the physical site.

⁴ See, 2020-2023 Alabama State Health Plan, p. 126.

⁵ AL2023-035, CON Application, *Executive Summary*, p.4. See also, SHPDA Staff Report - CON Project AL2023-035, which includes references to a "multi-specialty ASC" or "*focused mostly*"; "*additional surgeries*", etc. and the SHPDA Press Release dated October 26, 2023, which includes – *multi-specialty ASC; mostly focused, additional procedures, etc.*

Alabama Administrative Code r. 410-1- 10-.03(1)(b) requires that notice of this Request for Modification be served on all parties of record. Central Alabama was the only party of record in the underlying administrative proceeding, and the *SHPDA Staff Report for Project No. AL2023-035* confirms that there is no opposition to the CON project.⁶

We look forward to the approval of Central Alabama's Request for Project Modification to relocate the ASC project within Jefferson County and recognition of the ASC's continued status as a multi-specialty ASC offering more than one surgical specialty. We remain available should you have any questions regarding this Request for Project Modification.

Respectfully submitted,

C. Ransburg-Brown
Senior University Counsel, UAB Medicine Enterprise

c: Dorothy Pak, General Counsel, UAB Medicine Enterprise

Re: Request for Additional Information - Project Modification
Central Alabama Orthopedic Ambulatory Surgery Center, LLC
Project No. AL 2023-035, CON 3056-ASC

Ms. Marsal:

This letter is in follow up your correspondence dated July 13, 2026, requesting additional information regarding the Request for Project Modification submitted by Central Alabama Orthopedic Ambulatory Surgery Center, LLC ("Central Alabama"), which authorizes the construction of a multi-specialty ambulatory surgery center at 600 Brookwood Village Drive in Birmingham, Alabama, consisting of sixteen (16) operating rooms, four (4) procedure rooms, pre/post-operative spaces, office, and workspaces for staff as well as shelled space for two (2) additional operating rooms.

In response to your Request for Additional Information, please note the following:

1. **In the Project Modification Request, the applicant seeks to relocate the referenced ASC project from 600 Brookwood Village Drive in the city of Homewood, Jefferson County, Alabama to a property owned by UAB Medicine Enterprise located in Birmingham, Alabama between the University of Alabama Hospital main campus and UAB St. Vincent's Birmingham Hospital. Please provide the physical address for the proposed relocation, which must include the county and zip code.**

As shown on the aerial view and street maps included in **EXHIBIT B** to the Request for Project Modification, Central Alabama ASC will be relocated to property owned by UAB Medicine Enterprise in Birmingham, Alabama in Jefferson County. The property is located on University Avenue between 22nd and 23rd Streets, South. The Jefferson County Commission's Land Planning and Development Services Office, Addressing Division, assigns addresses during the building permit/commercial site review process.¹ Central Alabama has not completed the permitting process due to the anticipated relocation, which prompted the Request for Project Modification. The U.S. Postal Zip Code for the property is 35205.²

2. **In the original CON application, it was indicated the new 70,766 square foot ambulatory surgery center at 600 Brookwood Village Drive in Homewood, Alabama would consist of sixteen (16) operating rooms, four (4) procedure rooms, pre/post-operative spaces, offices, and workspaces for staff, as well as shelled space for two (2) additional operating rooms. Please provide additional**

¹See, <https://www.jccal.org/357/Addressing>.

² See, <https://www.unitedstateszipcodes.org/35205/>.

information concerning the square footage as well as the number of operating rooms and procedure rooms for the new surgery center at the proposed relocation site.

Central Alabama fully intends to construct the same 70,766 square foot ambulatory surgery center approved by the CON Review Board in CON 2023-035, CON 3056-ASC. The ASC will consist of sixteen (16) operating rooms, four (4) procedure rooms, pre/post-operative spaces, offices, and workspaces for staff, as well as shelled space for two (2) additional operating rooms. The physical footprint of the ASC project remains unchanged from the original application.

3. In Exhibit C of the referenced filing (Part I, Section IV, Costs), "*other equipment*" costs are projected to be \$30,000,000.00; however, in the original CON application, the applicant estimated \$22,000,000.00 for *major medical equipment*. Please provide an explanation to the Agency as to why the purchase of major medical equipment is no longer required for the proposed project.

EXHIBIT C of the Project Modification inadvertently lists the cost of the Major Medical Equipment on the wrong line. A revised version of Part I, Section IV, Costs is attached hereto and by this reference, incorporated herein as a part of this response in ATTACHMENT 1.

4. In the original CON application, it was stated the project would be funded with \$98,377,391.00 from new earnings and revenues, \$8,500,000.00 from cash on hand (equity raise), and a \$17,500,000.00 commercial loan. In Exhibit C (Part I, Section V, Source of Funding) of this request, the applicant reports the relocated ASC project will be funded with \$125,366,577.00 from cash on hand. Please provide an explanation indicating the funding source from which *cash on hand* will be derived.

The Central Alabama ASC project, as originally approved, included equity partners as well as a commercial loan. Because the hospital/physician joint venture did not come to fruition, there is no longer a need to obtain outside or additional funding for the project. The funding source is from "cash on hand". Under generally accepted accounting principles, "cash on hand" refers to the total amount of immediately accessible funds, including cash or cash equivalents, that an entity can access.

5. Agency records reflect Certificate of Need 3056-ASC was issued March 4, 2024, to develop a multi-specialty ambulatory surgery center at 600 Brookwood Village in Homewood, Alabama. The CON identifies the "services to be provided" as development of a multi-specialty ASC "providing solely orthopedic surgery and related pain management procedures." The project modification request, however, states that Central Alabama Orthopedic Ambulatory Surgery Center will offer multi-specialty surgical services, including orthopedics and pain management services and other ASC-appropriate procedures, including but not limited to, gastroenterology, dermatology, otolaryngology, plastic surgery, urology, gynecology, and podiatry. If the applicant seeks authority to provide any such additional services, please identify each proposed service line and explain with specificity where that service line was specified in the original CON application and evaluated in the original proceeding. If the applicant contends that no new CON application is required, please explain why the proposed additional service lines do not constitute "new health services not specified in the original CON application" within the meaning of ALA. ADMIN. CODE r. 410-1-10-.03(2) and thus requiring the filing of a new Certificate of Need application.

The Project Modification does not constitute "*new health services*" because Central Alabama always planned to provide multiple surgical specialties in the proposed facility. Moreover, the Alabama Administrative Code permits a "proposed change in project," including the addition of a health service or services, by approval of the Certificate

of Need Review Board.³

On the one hand, Alabama Administrative Code r. 410-1-10-03(2) provides that, “any change in the project involving...the provision of new health services not specified in the original CON application shall require the filing of a new CON application.”⁴ However, the rule fails to define or offer guidance on what constitutes “new health services.”

On the other hand, ALA. ADMIN. CODE r. 410-2-4-.12 and the Alabama State Health Plan (SHP), provide relevant guidance on the nature of health service specialties in ASCs. The 2020-2023 SHP, which applies to the proposed project, recognizes two types of ASCs: (1) *multi-specialty* ASCs “in which *more than one surgical specialty is represented*,” and (2) specialized ASCs “in which a *single, exclusive surgical specialty is represented*.”⁵ A multi-specialty ASC is not defined by reference to a fixed or enumerated list of specific specialties. Rather, for a multi-specialty ASC, its defining characteristic is the provision of surgical services across multiple disciplines. When approving a multi-specialty ASC, the CON Review Board approves a facility delivering *more than one* surgical specialty. Accordingly, an original CON application identifying a facility as a multi-specialty ASC necessarily contemplates the provision of multiple surgical specialties.

The history of the Central Alabama CON Application supports the understanding that Central Alabama clearly anticipated providing *more than one* surgical specialty. Throughout the CON review process, Central Alabama consistently represented that the proposed facility would provide *more than one* surgical specialty. The following facts evidence such representation:

- Central Alabama’s CON application states that, although the ASC would be focused on providing orthopedic surgeries, “*additional* surgeries, such as pain management services, [would] also be provided.”⁶
- Throughout the SHPDA Staff Report, the agency references a “multi-specialty ASC” and “additional surgeries.”⁷
- The SHPDA Press Release dated October 26, 2023, includes references to the ASC’s status as *multi-specialty* and providing *additional procedures*.
- The CON Review Board’s Agenda for January 17, 2024, explicitly states *additional surgeries* may be offered. For ease of reference, a snapshot of the Agenda is included here:

³ ALA. ADMIN. CODE R. 410-1-10-.03(1)(a).

⁴ ALA. ADMIN. CODE R. 410-1-10-03(2).

⁵ *2020-2023 Alabama State Health Plan*, ALA. ADMIN. CODE R. 410-2-4-.12, p. 126.

⁶ AL2023-035, CON Application, *Executive Summary*, p. 4.

⁷ *SHPDA Staff Report – CON Project AL2023-035*.

- I. AL2023-035, Central Alabama Orthopedic Ambulatory Surgery Center, Homewood, AL:** Proposes to develop and operate a multi-specialty Ambulatory Surgery Center (ASC) consisting of sixteen (16) operating rooms, four (4) procedure rooms, pre/post-operative spaces, offices, and workspaces for staff, as well as shelled space for two (2) additional operating rooms in the city of Homewood, Jefferson County, Alabama. The proposed surgery center will be focused mostly on providing orthopedic surgeries, but additional surgeries, such as pain procedures, may also be offered. **Opposition:** None

The public had ample time during the CON Review Cycle to oppose the project or request clarification when “additional surgeries” under a “multi-specialty” ASC were consistently listed in the application, agency reports, news releases, and at the public hearing. Yet, no provider opposed Central Alabama’s proposal to offer multi-specialty surgical procedures at the facility. The provision of the surgical specialties detailed by Central Alabama in its Project Modification is not a departure from the approved project or beyond a reasonable interpretation of the services to be performed in a multi-specialty ASC.

- 6. In Exhibit C of the modification request (Part V, Section B, Project Specific Financial Information), the applicant neglected to list the projected years for *Projected Data*.**

For an updated version of Part V, Section B, Project Specific Financial Information, reflecting the projected years for the *Projected Data*, please see ATTACHMENT 1, which is attached hereto and by this reference, incorporated herein as a part of this response. The original CON application did not cite specific years and only included Project Specific Financial Information, *Projected Data*, for “Year 1” and “Year 2”. We have included the same references in the updated EXHIBIT C.

- 7. The project modification request states that the originally contemplated joint venture with ASMC Physicians and US Orthopedic Partners did not reach completion and that Central Alabama Orthopedic Ambulatory Surgery Center, LLC remains the sole owner of the ASC project. Please confirm the current ownership and governance structure of Central Alabama Orthopedic Ambulatory Surgery Center, LLC and provide supporting documentation, including any organizational chart, operating agreement, ownership schedule, management agreement, or similar document reflecting current ownership, control governance, and operation of the project. Please also state whether any physician ownership, management, medical director arrangement, use agreement, block-time arrangement, or other physician participation is currently contemplated.**

As mentioned in the Status Review Letter/Progress Report and in the original Request for Project Modification, Central Alabama is the sole owner of the project. Central Alabama is a limited liability company, and its sole member is UAB St. Vincent’s Health System.⁸ As previously reported, “currently, there is no physician ownership in, and no immediate plans to add any physician ownership of, the ASC”.⁹ UAB St. Vincent’s Health System will remain the sole member of Central Alabama, and Central Alabama will maintain sole ownership of the ASC and will be solely responsible for its governance, administration, and management. Currently, there are no medical director arrangements. However, consistent with ADPH licensing requirements, a physician medical director will be appointed prior to furnishing services.¹⁰ The ASC will be operated using both block time (by specialty)

⁸ A copy of the organizational chart for Central Alabama was attached as EXHIBIT A to the April 24, 2026, *Response to Status Review Request and Progress Report*.

⁹ *Response to Status Review Request and Progress Report*, dated April 24, 2026, ¶15, p. 2.

¹⁰ ADPH requires that a qualified physician medical director be appointed or designated by the [ASC’s] governing body. ALA.

and individual use time to ensure quality care, operating efficiency, and cost containment at the ASC. As the project progresses, Central Alabama will ensure, consistent with all applicable regulatory requirements, that its credentialed medical staff maintains proper clinical oversight of the facility.

- 8. Please identity the anticipated sources of utilization for the relocated project, including utilization expected from UAB, UAB St. Vincent's, UAB St. Vincent's physicians, UAB physicians, former Andrews-associated volume, other physician groups, or other sources. To the extent the anticipated sources of utilization differ from those described in the original CON application, please explain those differences and their effect on the project's need, feasibility, and consistency with the project as originally approved.**

Just as in the original CON application, the anticipated sources of utilization for the project will be derived from existing patients within Jefferson County, the eleven counties outside of Jefferson County, population growth within the service area and surrounding counties, and referrals generated by affiliated physicians and health care providers from UAB St. Vincent's Birmingham and UAB Medicine Enterprise. To the extent there is any variance in anticipated utilization from that projected in the original CON application, such variance would be attributable to UAB's acquisition of Ascension St. Vincent's and the resulting integration of the proposed ASC into UAB Medicine Enterprise. Such effects are independent of, and would occur regardless of, the proposed relocation. Accordingly, the relocation itself does not alter the anticipated sources of utilization for the project. Further, just as in the original application, the proposed ASC will be held to the same high-level accreditation standards, utilization review practices, quality improvement activities, and monitoring as are currently in place at UAB St. Vincent's Birmingham and UAB Medicine Enterprise.

Should you have any questions regarding the Response to Request for Additional Information, please do not hesitate to reach out directly by calling (205) 975-4844 or by sending an email to cransburgbrown@uasystem.edu.

Respectfully Submitted,

Cynthia Ransburg-Brown
