Re: Request for Project Modification - Project #AL2012-033

Dear Mr. Lambert:

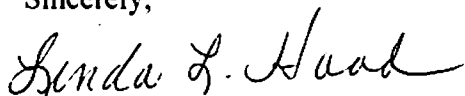

Our Certificate of Need under #11, Services Provided, gives us permission to add 2 stations for a total of 12 stations, one (1) of which will be used as an isolation station.

I am requesting removal of the reference to isolation station and have it read as follows: "will add two (2) hemodialysis stations to its existing ten (10) station facility located in Moulton, Alabama for a total of twelve (12) stations".

When we applied, we were looking at Federal Guidelines that permit existing clinics to dialyze a positive patient at the end of the RO loop. After speaking with Carolyn Duck and Charles Brown, I understand that State guidelines do not allow this, and we would be required to build a separate room for a positive patient. We do not have space for that addition.

Enclosed is my check for \$500 for fee for modification. I apologize for the inconvenience and appreciate your assistance.

Sincerely,

Linda L. Hood
Administrator
