A. Emergency Outpatient Unit

1. The hospital's emergency facilities and services (usually called the "emergency department" or "emergency room") intended primarily for care of outpatients whose conditions require medical attention. Indicate below the emergency medical care provided that best describes this facility.

Comprehensive 24 hours a day, including in-hospital physician coverage for medical, surgical, obstetric, and anesthesiology services by members of the medical staff or senior level trainees.

Limited by the lack of immediate coverage in some major specialties, but a physician is always present in the emergency area, a surgeon is immediately available for consultation, and other clinical specialists are on call within 15 to 30 minutes. Following assessment by a physician, a few patients may be transferred to another facility

Essentially prompt emergency care available at all times. Basic medical and surgical service is usually supplied within 30 minutes or less. Certain well-defined clinical problems are always immediately transferred to another facility, while others may require specific assessment before transfer.

Little or none beyond first aid given by a nurse. There is a written plan relative to handling individuals who inadvertently appear for treatment.

Non-existent. There is no emergency service or plan offered at this hospital.
